

## **Wildflower Introduction**

**Brompton Town Council are planning to sow and establish sections of Wildflowers in these areas to improve biodiversity and create a wildlife habitat for bees, insects and butterflies. Please help us by not walking on the areas staked out.**

### **DID YOU KNOW?**

**British Meadows and grasslands are one of our most endangered landscapes. Across the UK 98% of wildflower meadows have disappeared over the last 40 years as agriculture has intensified. We might have improved productivity but at a cost to huge swathes of our natural heritage. This is the beginning of helping to transform the fortunes of our wildflower meadows and work towards this Parish entering Britain in bloom 2021. Get involved contact [bromptonpc@aol.com](mailto:bromptonpc@aol.com).**
